

“Art and Science” in other Media

Text: [Stefan Oehm](#) | [Summary](#)

Art and science, they seem like fire and water, yet they are so very closely related; a fact dating back to ancient times. Then and now, art seeks the proximity of science – and science the proximity of art. In the series “Art and Science” in other media, Stefan Oehm tracks down exhibitions, performances, books, symposia and newspaper articles on the topic.
